

I want to express my support for XM Satellite Radio and its efforts to provide traffice and weather channels. XM provides a variety of channels that aren't available anywhere else. As a subscriber, I pay for my service, and this service should not be curtailed due to the self-serving National Association of Broadcasters. If their members had provided a decent product, I wouldn't have had to subscribe to XM. Please reject NAB's pretition 04-160 so that I may continue to receive the excellent service provided by XM Satellite Radio. Thank you,

Richard A. Dorsey
